

Secure or Cure? Choice is yours!

Proactive roof care guidelines

Surface Maintenance

1 Remove guardfilm immediately after installation

3 Keep roof clear from any damaging object

2 Remove leaves, twigs, debris etc. regularly

4 Clean dirt in valleys with water and soft bristled brush regularly

5 Check regularly for loosened nails, rivets & screws

6 Fix loose or damaged flashings immediately

Remember

- Wear gloves for cleaning roofs
- Use a nylon or soft bristled brush
- Wash from top to bottom; with clean water
- Shovels or hard tools to be avoided
- Use a hose to wash off roofs and gutters
- Remove water ponding and trappings regularly
